What is farmhopping?

Farmhopping.com is an online platform that bridges the gap between the farms that use sustainable methods of agriculture and the city people.

How do we help?

Farmhopping provides the farms an opportunity to create their own virtual market and reach the final consumer and thus eliminates the mediator and increases the income.

From one perspective the platform provides the farmers access to new customers and therefore an additional funding for their farm and from another it makes the process of communicating with the existing customers easier.

How does farmhopping work?

In farmhopping the farmers create the profile of their farm where they put information about their activity and the products they offer.

How much does it costs?

Creating a profile on the platform is absolutely free. The only tax you pay is 10% of every successful transaction. When supporting a farm you transfer the payment directly to the farm's account and the website gives you the opportunity to choose the means of payment – cash on delivery, through bank payment, at an Easy Pay office or through your ePay or PayPal account.

How to join?

You can fill in the information for your farm on www.farmhopping.com and we'll contact you.
